

# Shahzaib Ajmal Subhani

Full Stack Web Developer | [PHP](#) / [Laravel](#) / [MERN](#)

+971 55 410 3529 | [shahzaibsubhani28@gmail.com](mailto:shahzaibsubhani28@gmail.com) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | Dubai, UAE

## PROFESSIONAL SUMMARY

---

Full Stack Developer with **4+** years of experience turning complex business requirements into scalable, high-performance web systems. Engineered **60+** API endpoints powering a UAE energy platform, built ERP systems processing 300k–500k transactions per month, and consistently reduced technical debt through refactoring and performance optimization. Proficient across the full stack — PHP/Laravel on the backend, React and Node.js on the frontend — with a track record of delivering reliable, production-ready solutions in fast-moving environments.

## TECHNICAL SKILLS

---

**Programming Languages:** PHP, JavaScript (ES6+), HTML5, CSS3, SQL

**Frameworks & Libraries:** Laravel, React.js, Node.js, Vue.js, Express.js, Inertia.js, jQuery

**UI & Styling:** Tailwind CSS, Bootstrap 5, Material UI

**Back-End & Database:** MySQL, MongoDB, RESTful API Development, WebSockets, Redis / Caching, RBAC

**Integrations & Services:** Stripe, Google Maps API, Firebase, Push Notifications, Email Services (SMTP/API)

**Tools & DevOps:** Git/GitHub, Docker, GitHub Actions (CI/CD), Composer, NPM, Postman

## PROFESSIONAL EXPERIENCE

---

### Laravel Developer

*Sep 2023 – Present*

**Zap Electric FZCO** — Dubai, UAE

- Architected and delivered a full-scale energy services platform with **6+** role-based access levels (Admin, Operations, Drivers, and more), managing orders, subscriptions, customers, trucks, routes, deliveries, and battery inventory end-to-end.
- Engineered **60+** RESTful API endpoints powering both the mobile app and website, supporting **500–5,000** active users.
- Integrated **Stripe** payment gateway for subscription billing and **Google Maps API** for real-time driver route tracking and delivery management.
- Implemented push notification and email notification systems delivering real-time alerts and important updates across the platform's mobile and web user base.
- Designed and optimized database schemas to support high-volume transactional data across all platform modules.

### Laravel Developer

*Aug 2022 – Jun 2023*

**Optimum Tech** — Pakistan

- Developed and maintained **4 – 5** large-scale ERP systems including marriage hall booking platforms and a car carrier management system built from scratch; migrated legacy codebases from **Laravel 6** to **Laravel 9** for improved security and maintainability.
- Refactored and optimized legacy ERP codebases, reducing page load time by **30%** through aggressive database query optimization and backend performance improvements.
- Built a comprehensive large-scale housing society platform with **9+** modules including gate pass management, HR, employee records, land records, and vehicle management — handling **300k–500k** gate pass transactions per month.
- Integrated **CCTV** image capture directly into the gate pass workflow, enabling real-time visual verification for operational security.
- Implemented security best practices and third-party API integrations to extend application functionality and harden system vulnerabilities.

## PHP Developer

Mar 2022 – Aug 2022

### Convert Generation IT — Pakistan

- Developed **5+** custom PHP web applications from scratch including a POS system, library management system, hotel booking platform, and a multi-vendor e-commerce site.
- Built **Exam 360** and **Exam 360 E-Learn** — an India-based examination & staff management platform and its companion LMS, supporting end-to-end exam workflows, course delivery, and student management.
- Built an online order booking system for **Al Haaj Bundoo Khan** — a well-known restaurant brand — delivering a responsive, customer-facing ordering experience.
- Developed **Musafir**, a real-time travel admin panel built with JavaScript and Firebase, managing travel bookings and itineraries with live data sync.
- Converted Adobe XD designs into pixel-perfect, responsive front-end code, ensuring faithful design-to-development handoff across multiple client projects.

## KEY PROJECTS

---

### Submittly — Automated Content Submission & Evaluation System | Final Year Project

Built a full-stack MERN application with role-based access across 3 user types (teams, evaluators, admins), an automated evaluation pipeline, and real-time team-admin chat via WebSockets. [GitHub ↗](#)

Stack: MongoDB, Express.js, React.js, Node.js, WebSockets

### Energy Management System — Zap Electric FZCO

Full-cycle Laravel backend serving 500–5,000 users via 60+ RESTful APIs, featuring Stripe subscription billing, real-time Google Maps driver tracking, and push/email notification systems supporting mobile and web frontends.

Stack: Laravel, MySQL, REST APIs, Stripe, Google Maps API, Push Notifications

### Housing Society ERP & Admin Platform — Optimum Tech

Large-scale housing society management platform with 9+ modules — gate pass management, HR, employee records, land records, and vehicle management — processing 300k–500k gate pass transactions per month with integrated CCTV image verification.

Stack: Laravel, MySQL, MVC Architecture

## EDUCATION

---

**BS Computer Science** — Virtual University of Pakistan | Graduated: Apr 2026

## CERTIFICATIONS

---

- **Node.js (Express & MongoDB)** — Udemy (2025)
- **React - (incl. Next.js, Redux)** — Udemy (2025)
- **JavaScript — Beginner to Advanced** — Udemy (2024)
- **CyberOps Associate** — Cisco Networking Academy (2024)

## ADDITIONAL INFORMATION

---

**Nationality:** Pakistan | **Visa Status:** Own Visa (valid till Dec 2027) | **Driving License:** Yes
